EQUIPPED WITH PIPER HALO SAFETY SYSTEM:

Autoland: HALO keep you safe when the pilot is incapacitated. HALO controls and guides

the aircraft to the nearest runway for a precision landing.

Automatic Level Mode: Returns the aircraft to a wings-level attitude with zero vertical speed with the push of a button.

Autothrottle: Fully integrated, standalone auto throttle, reducing pilot workloads from climb-out to landing approach by automatically adjusting the aircraft's power mode settings based on preset flight profiles.

Hypoxia Recognition System with Automatic Descent Mode: Monitors pilot interaction when autopilot is engaged at cabin altitudes above 14,900 feet. The system brings the aircraft to a lower altitude to allow recovery from hypoxia.
